

# pc tuneup 2011

Get the most  
out of your PC

You already know how AVG can protect you online. Now we take our expertise one step further by fixing problems that slow you down. AVG PC Tuneup 2011 provides 16 useful tools to help you get the most out of your PC.

## **IMPROVE YOUR PC'S SPEED, PERFORMANCE AND STABILITY**

Registry Cleaner keeps your computer from slowing down, freezing or crashing. All the changes you make are backed up and can be undone quickly and easily. You can also reorganize files, as well as improve application response time, PC start-up speed and overall performance.

## **FREE UP DISK SPACE**

Disk cleaning tools remove duplicate and junk files from your hard disks, giving you back valuable space. You can also identify large files and save the ones you don't need to a removable drive.

Remove duplicate and junk files from your hard disks to free up valuable space. You can also identify large files and save the ones you don't need to a removable drive.

## **IMPROVE YOUR INTERNET CONNECTION**

Internet Optimizer automatically tunes your Internet connection settings to the type of Internet connection you use. Unlike similar products, the Internet Optimizer will test your connection settings before applying any changes.

## **PROTECT YOUR PRIVACY**

Permanently delete files and wipe disks so your personal data cannot be easily recovered. You can choose from four different shredding options, ranging from fast to military-level safety shredding.

You leave traces when you surf the Internet, open documents or run programs. Track Eraser will help you protect your privacy by hiding these traces so that no one can see which websites you have visited or which documents you have recently opened.

## **RECOVER LOST FILES**

Recover files that have been damaged or accidentally deleted within Windows. File Recovery also allows you to preview photos and documents while browsing through your list of found files.

- Increase your Internet speed
- Free up disk space
- Protect your privacy
- Clean your registry and stabilize your PC
- Improve your PC's performance
- Recover and protect your personal files

## Why AVG PC Tuneup 2011?

### INCREASE SPEED AND PERFORMANCE

**Internet Optimizer** | Speeds up your Internet access by tuning settings specifically to your connection type

**Service Manager** | Disables unnecessary services that use up valuable memory, processor power and space

**Tweak Manager** | Customize 280+ Windows settings to improve your system's speed and performance

**Registry Defrag** | Rewrites your registry to consume less memory and give your applications faster access

**Startup Manager** | Frees up system resources by turning off unnecessary programs that run on startup

**System Information** | Provides a comprehensive overview of your PC—invaluable when getting technical support

### IMPROVE YOUR PC'S STABILITY

**Uninstall Manager** | Removes applications quickly and properly deletes installation files from your registry

**Registry Cleaner** | Fixes corrupted registries that cause your PC to slow down, freeze and crash

### FREE UP DISK SPACE

**Disk Cleaner** | Removes clutter and junk files from your hard disks

**Duplicate File Finder** | Eliminates duplicate files and gives back valuable space

**Disk Explorer** | Identifies large files and save the ones you don't need to a removable drive

### PROTECT YOUR PRIVACY

**File Shredder** | Ensures sensitive files can't be recovered and read by prying eyes

**Disk Wiper** | Wipes entire drives, making sure that deleted files can't be restored

**Track Eraser** | Prevents others from learning which websites, files and applications you've opened

### PROTECT AND RECOVER PERSONAL FILES

**File Recovery** | Recover lost files as a result of software errors and accidental deletion

**Disk Doctor** | Identifies bad sectors, lost clusters and directory errors that can cause data loss

## Customer Support
